

Demystifying acoustics for the multi-family and multi-story industry

You are a Developer, Architect, GC, Flooring Contractor, Engineer or Property Manager.

You're often frustrated with:

- * Acoustic complaints and/or lawsuits *
- * Customers' negative perception of buildings *
- * New code regulations (i.e. need to reduce weight, acoustic requirements) *

If this resonates with you - this seminar is for you.

When: Thursday, November 7, 2019

Where: Delta Hotel and Conference Centre, 4331 Dominion Street, Burnaby, B.C.

Time: 8:30 am to Noon (snacks included)

Cost: \$95 plus GST

The *Truth* about Flooring/Ceiling Assemblies

Educator: André Rioux, Co-owner/Business Development, AcoustiTECH a division of FINITEC GROUP, St. Lambert-de-Lauzon, QC

Since the creation of AcoustiTECH in 2000, Andre has been travelling all over Canada and the U.S. to collaborate with architects, developers, engineers and contractors. Andre's experience, combined with the expertise of his team, has resulted in AcoustiTECH being a reference in the field of acoustics for new and existing buildings. After over 18 years, Andre continues to enjoy meeting with professionals and contribute to the success of their projects.

Acoustics 101 – Building code guidelines and more

Educator: Philippe Miville-Deschênes, P.Eng, Project Consultant, BKL Acoustical Consultants, North Vancouver, BC www.bkl.ca

Philippe has been an acoustical consultant since 2012. During that time, he has performed measurements and simulations, and recommended mitigation treatments on a variety of residential, commercial and environmental projects. In addition, he has developed noise control guidelines for multi-family dwellings to assist project design teams, general contractors and tradespeople in providing a satisfactory acoustical environment for future residents by minimizing intrusive noise from the environment, building systems and appliances and maximizing acoustical privacy between residential units, etc.
